

PEDESTRIAN ALLEYWAYS

Converting alleyways to pedestrian walkways in downtown will improve circulation and walkability, reduce pedestrian/vehicle conflicts, and create opportunities for placemaking. The Downtown Master Plan recommended that some of the north-south alleyways be converted to pedestrian walkways to connect public parking lots to downtown amenities. The diagram on the previous board illustrates the proximity of downtown amenities to these parking lots, with most areas inside a 2-3 minute walking radius.

Below are strategies for converting these spaces into pedestrian alleyways that feel safe, clean and accessible to all users:

WALLS:

- ARTISTIC MURAL PAINTING
- LIGHT COLOR PAINT TO BRIGHTEN THE SPACE
- POWERWASH BRICK OR STONE TO ENHANCE LOOK

PAVEMENT:

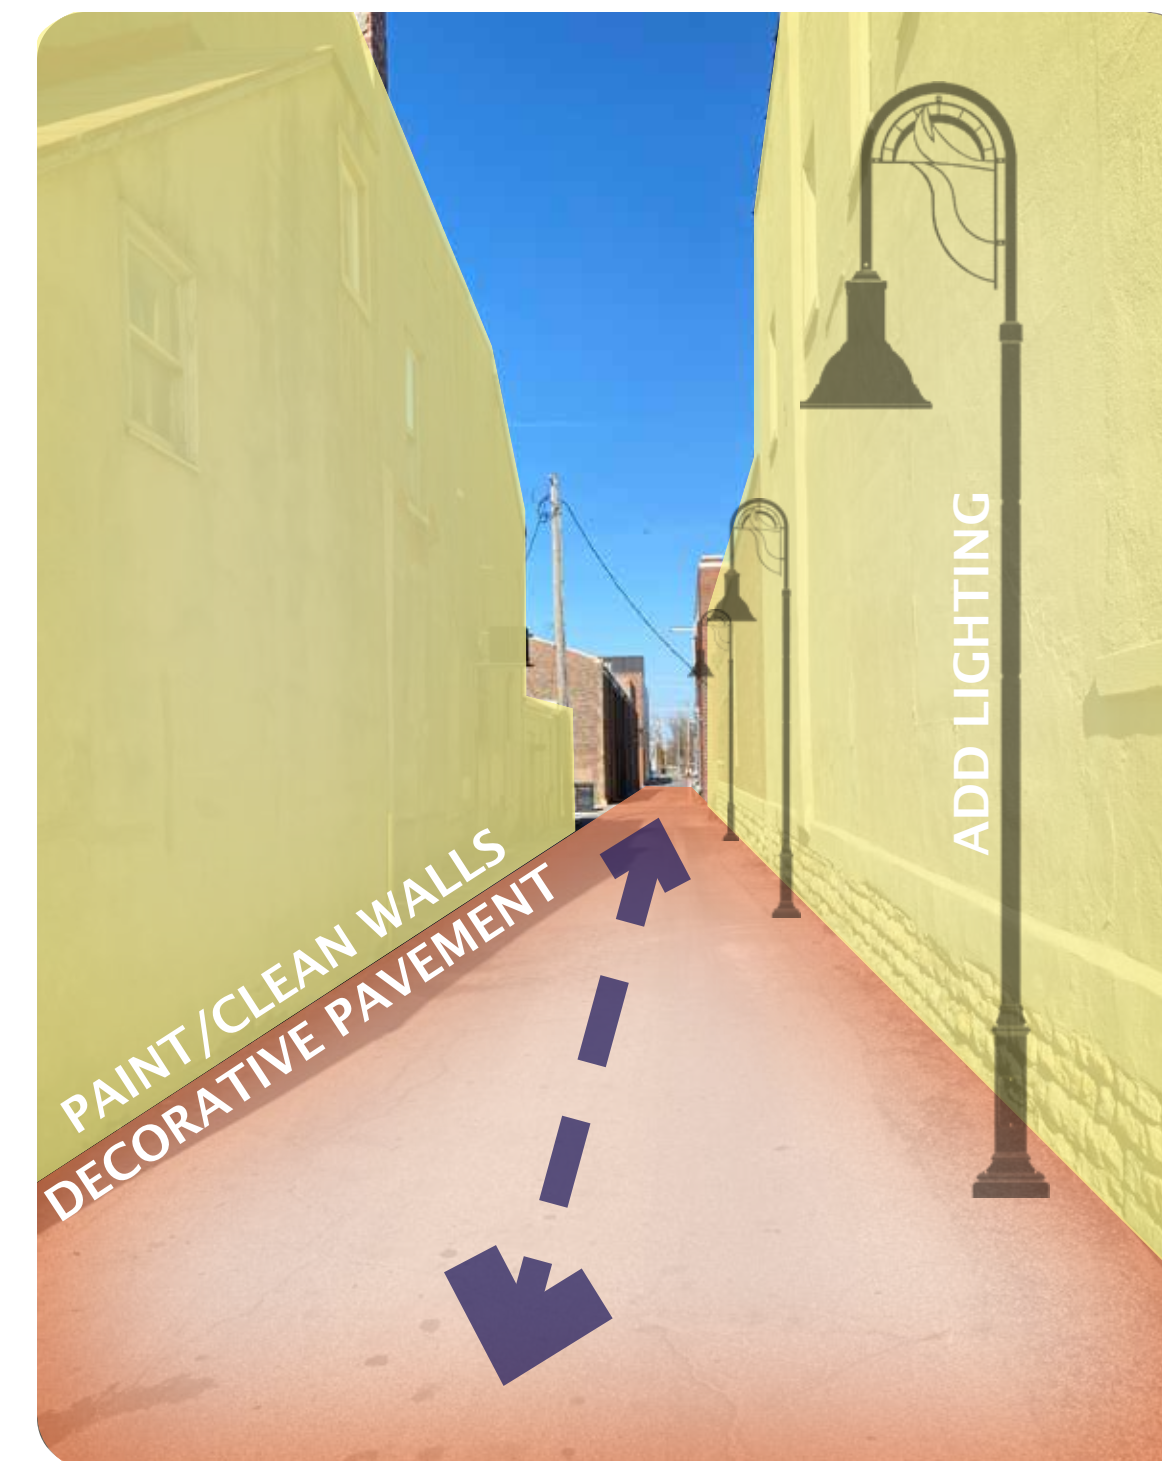

- UTILIZE PAINT TO ADD COLOR AND INVITE USERS TO WALK THROUGH SPACE
- ADD COLORED CONCRETE OR PAVERS TO GIVE THE SPACE A PLAZA-LIKE LOOK

OTHER IMPROVEMENTS:

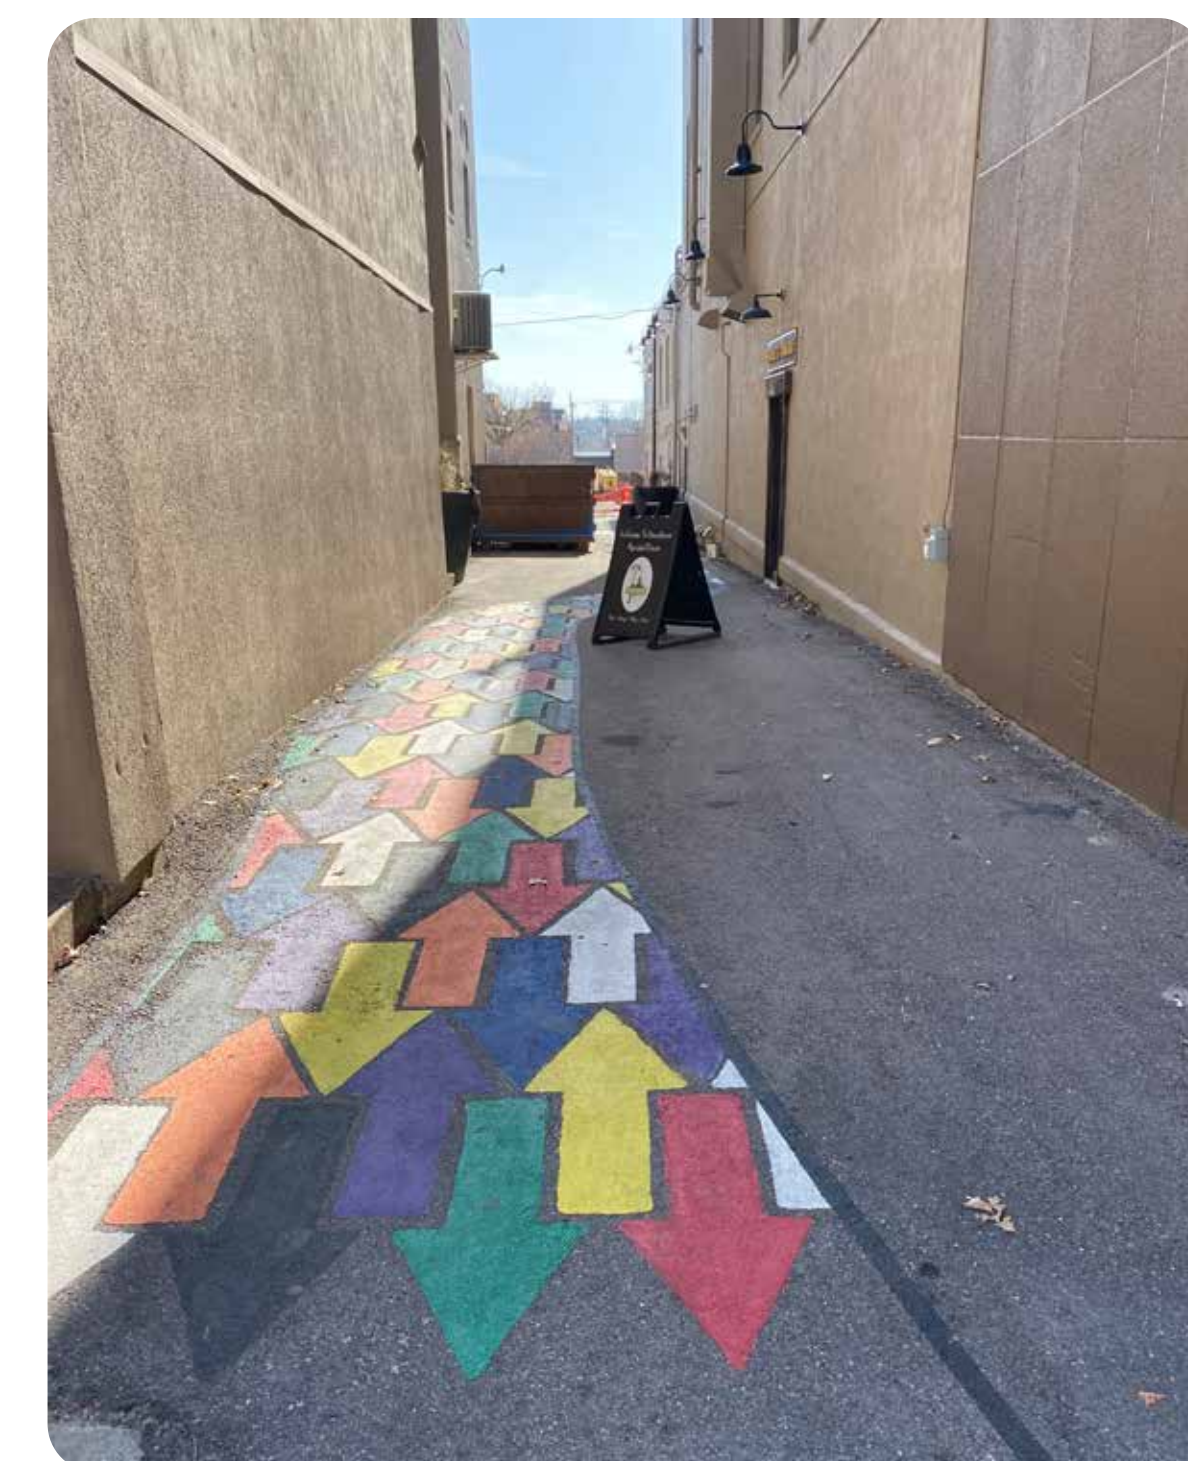

- ADD LIGHTING TO IMPROVE VISIBILITY AT NIGHT
- IF SIZE ALLOWS, ADD PEDESTRIAN AMENITIES SUCH AS SEATING AND PLANTERS
